Student

EXPERIENCE

Anaplan Model Builder Intern

Veear Analytics Inc, Mumbai, Maharashtra, India

1st July - 31st July

During the internship, I had worked closely with experienced Anaplan professionals to develop and refine planning models for real-world business scenarios. I learned how to gather requirements from stakeholders, design data models, and implement them using Anaplan's intuitive drag-and-drop interface. Additionally, I gained exposure to various industries, including finance, sales, supply chain, and human resources, as I build custom solutions tailored to each organization's unique needs.
